

Ted Kang

Research & Analysis | Commercialization Strategy | Business Development

Flushing, NY | khted.kang@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Carnegie Mellon materials science and engineering graduate with experience in technology commercialization, government funding, and global business development. At UAM Korea Tech, contributed to patent filings and project planning for medical waste and smart logistics technologies. Native English speaker, fluent in Korean, and a U.S. citizen who does not require employment sponsorship.

EXPERIENCE

UAM Korea Tech

Seoul, South Korea

Researcher, R&D Center

Jun 2025 to Present

- Coordinated UAM Korea Tech's first export, an approximately USD 15,000 shipment to Europe, managing customer communication from initial outreach through shipment completion
- From June 2025 to present, contacted more than 50 prospective partners and conducted 13 meetings in English; three of those relationships progressed to signed MOUs
- Contributed to 14 government funding applications by researching program requirements and drafting project goals, work plans, team roles, budgets, and delivery schedules
- Supported four patent applications covering medical waste sterilization, mobile treatment, and decontamination systems by preparing technical research, specifications, figures, and filing materials
- Developed pilot plans for recovering used self injection devices and operating a mobile medical waste treatment vehicle, outlining collection steps, team responsibilities, timelines, budgets, and test criteria
- Assessed market demand, regulations, and competitors for drone logistics, AI forecasting, and gas sterilization concepts to support product and funding decisions

Samsung Fire & Marine Insurance

Seoul, South Korea

Intern, Data Analytics Center

Jun 2018 to Aug 2018

- Processed and organized daily batches of more than 10,000 vehicle accident images for an AI insurance risk dataset
- Analyzed insurance risk trends and checked label consistency to support actuarial model updates

EDUCATION

Carnegie Mellon University

Pittsburgh, PA

Bachelor of Science in Materials Science and Engineering

May 2025

- Capstone: Investigated cast iron soil pipe failures using electron microscopy, elemental analysis, and stress modeling; presented cost and environmental recommendations to an industry sponsor
- Polymeric Biomaterials: Designed a microneedle insulin patch concept and evaluated material selection and intellectual property considerations

CORE SKILLS

Technical: Scanning electron microscopy (SEM), energy-dispersive X-ray spectroscopy (EDS), failure analysis, stress modeling, materials characterization, biomedical materials

Commercialization & Strategy: Proposal development, pilot design, patent support, feasibility assessment, market and regulatory research, partner outreach

Languages: English (native), Korean (fluent)

LEADERSHIP

Carnegie Mellon Buggy Racing Team | Senior Mechanic: Maintained chassis and components for practices and races; taught weekly workshops for new mechanics
